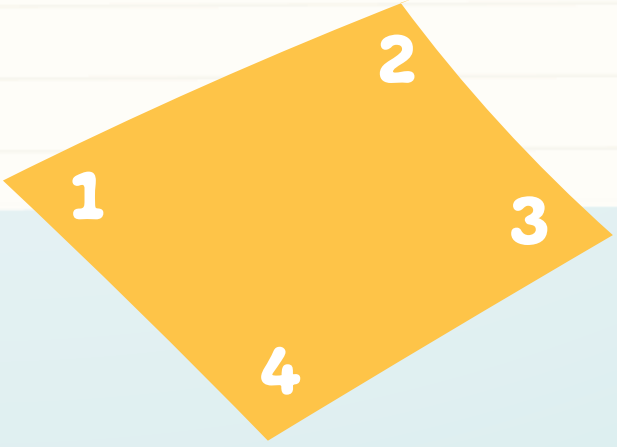
Treating your body with Respect and Dignity

4 Corners Game:


1. Number each corner of the classroom 1-4
2. Select one student to be "it". They close their eyes while every other student goes to one of the 4 corners of the room.
3. When the students are settled, "it" calls out a number between 1-4.
4. All the children in that corner then need to sit down.
5. "It" closes their eyes again. Students move to a new corner. "It" calls out another number between 1-4 and the students in that corner need to sit down.
6. When down to the last 4 students. Each takes their own corner and "it" calls one last number.
7. The person who's number "it" calls wins- and then they become "it".
8. Play 3-5 times!
